WHY BIOLOGY??

THE IMPORTANCE OF IT ALL...

Biology plays an important role in the understanding of complex forms of life involving humans, animals and plants.

Understanding these intricate details of life helps humans understand how to care for themselves, animals and plants in the proper manner. Biology helps individuals understand the interaction between humanity and the world. It also develops interests in the lives of living organisms, in an effort to preserve them.

CELLULAR STRUCTURE

Let's Learn Together!!

In this class you will practice observing, communicating, investigating, identifying problems and designing solutions. You will study how living things interact and impact you in your daily life. You will spend a lot of time working with partners and in groups to help you practice your communication skills. This class will be fun and interactive. My goal is to help all my students walk away from biology with confidence, knowledge, and endless wonder.
