

Schedule for the Day:

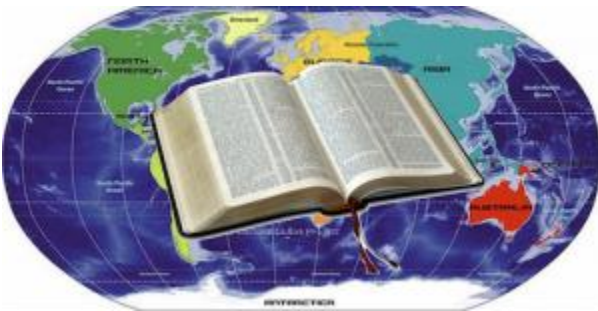

10:00am - CSI (Creation Science Investigation): Science Confirms the Bible – Is it true that man's idea of origins by natural means, called "science," proves the Bible is a myth? Trying to explain where matter came from, where life came from, and how we got all the diversity of life today, without believing what God said in His Word, only leads to absurdity. When people assume that God does not exist, they reduce themselves to saying some really foolish things. What if what we see in nature today actually confirmed what God said in His Word is true? Our Creation Scene Investigation will help us see that science is really the creationists' best friend.

11:00 am - Dinosaurs and the Great Deception – Why is it increasingly difficult to reach people for Christ today. Why is this world so divided and antagonistic to the gospel? The world is really divided over where we find truth. The world has a story of beginnings that tells us that we are just animals with no purpose, and people are acting like it. Dinosaurs are probably used more than anything else to convince children that evolution is true and the Bible is a myth. The church must be able to counter this with a proper understanding of what the Bible really says about dinosaurs.

12:00noon - LUNCH BREAK (Pack your own, or plan to go out to one of many nearby restaurants.)

1:00pm - How the Bible Changed the World – Have you ever wondered why Europe and North America have so much freedom and prosperity while so many other areas of the world have struggled for centuries? Some say it is because certain people are less evolved. The truth is that the Bible has changed the world. We begin by contrasting the true perspective of reality given to us in the Bible with other worldviews around the world that have kept people in poverty. We conclude with the worldview clash in America between the Bible and Secular Humanism, and how humanists have been successful in teaching their lies to the

younger generations. This false worldview will lead to devastating consequences right here in America. This talk is designed to give a greater appreciation of the importance of the Bible and explain why America is so divided today.

2:00pm - Dueling Worldviews – How can so many sincere people have such diametrically opposing views about how to make this world a better place. Many people start out by believing the basic assumption of Secular Humanism. This worldview permeates much of the western influenced world. It has taken over educational institutions, the media, and much of political thinking. By contrasting the basic starting beliefs of a Biblical Worldview with the starting beliefs of Secular Humanism, we'll begin to see how these contrasting views will flesh out in the political, moral and social issues of our day.
