## **Class description:**

This is a high school level class of American History. We will begin discussing the explorations to the New World from the first explorations of the Europeans-to the founding of our country-to present day United States of America. We will discuss the Godly influence in the forming of our nation, as well as Christian issues/current events and the current condition of our nation.

We will use the textbooks as a guide...students will have reading from the textbooks and homework from the book each week. The majority of our class discussions will go above and beyond the textbooks.

This class is lecture and discussion driven. The more students participate in class discussions, the more they will get out of the class.

There will be handouts for each class and students will use these to take notes. They will use these handouts for certain assignments and use their books for other assignments.

Students should expect to spend 1-3 hours each week on homework.
