| | |
|---|--|
| Lower Elementary K-2nd | In kindergarten, we use a unit study or thematic approach to learning. Students will learn about a new theme each week. Reading, math, social studies, science, and language concepts are taught throughout the year. In first grade, students use <i>First Language Lessons</i> in class and at home. They use a hands-on approach completing a full year of science and history. They also learn math and reading concepts using games and hands-on activities. Second graders have the same subjects and concepts as first graders, only at a higher level. They also use the IEW PALS program to learn early writing skills. |
