### Young PIONEERS GENERAL SCIENCE

(Grades 2–3 and 4–5)

**Tutor:** Mrs. Michelle Boulis  
517-740-6975  
[mbpioneers21@gmail.com](mailto:mbpioneers21@gmail.com)

**Textbook:** None required

**Supplies:** Two, 2-pocket folders

**Recommended Supplemental Resources:** (All required resources will be distributed by the teacher in class and no textbook is required. However, if you would like to supplement your science study for older students, the following resources are recommended):

- **Exploring Creation with Earth Science** (Apologia's *Young Explorer Series*)
- **Exploring Creation with Botany 2ND EDITION:** (Apologia's *Young Explorer Series*)

**Class Description/Expectations:** I plan to use both books throughout the year to make the most that we can out of the botany book when the seasons work best. It is my hope to be able to tie together both of these curriculums to show students how intricately God designed our home planet: from Earth's perfect place in the cosmos down to the microscopic fungi.

*O Lord, how manifold are Your works! In wisdom You have made them all. The earth is full of Your possessions— Ps 104:24 NKJV*

**Please note:** In class, we will have a lot of hands-on activities for your child grow to love our world around us!

There will be no weekly homework assigned except on the "off-site week when I plan to send home a fun project. This will give the kids plenty of time to complete, and I will give more details as we get closer. It is also my intention to send out a monthly newsletter listing the topics that we will be going over, so if you want to supplement more at home, you have some time to prepare to do so. I will occasionally send home some additional material for the kids to explore at home for fun.

Please feel free to call/text or email me with any questions throughout the year. I'm excited to meet everyone and begin this new journey over the next school year.
