- V. Select Update App Design to Save Changes.....4

## I. App Icon + Name

From the Admin Home Page, navigate to **Appearance > App Design**.

- A. To upload a custom image for the app icon, browse on your device to choose the image file.
- B. To change the name of the app, enter the name in the name field beneath the app icon.
- C. Warning! Changes to either of these things will require families to reinstall the app. It is recommended to change this setting as infrequently as possible. You might also consider communicating the change with your members ahead of time and making the change at a strategic time when the required uninstall and reinstall of their app will be less impactful.
