

Web Forwarding With Masking

To Keep Your Current Domain and Use the Homeschool-Life.com Service:

Homeschool-Life.com does not provide direct support for domain redirections as we feel you can save some money and manage this feature yourself. We are available should you need assistance to work through this process.

Domain redirects are meant for URL forwarding with masking of your current domain address. Masking will make your site visitors see your forwarded web address in the window of their browser throughout your entire Web site, so your visitors are blind to the fact they are being sent to a different site. You will need to contact the company where you registered the domain. You have the ability to turn your new Domain Masking feature on or off at any time through their online account manager. Masking lets you maintain the appearance of a single Web address in the browser window, even if you are forwarding a domain name to another site. Just enter the Web site address where you would like your visitors to be redirected. **Note:** It may take 24-48 hours for edits to web forwarding to update throughout the Internet.

When you gain access to your account, you will want to redirect your domain name to www.homeschool-life.com/state/yourgroupname/. Be sure to choose “masked URL forwarding”. Typically, URL forwarding is \$5 per month

An example of Domain forwarding is: www.seiche.us who redirects to <http://www.homeschool-life.com/in/seiche/>.

For more information on masked URL forwarding see http://www.dotster.com/products/domaintools/dt_urlfwd.php.
