Back to Homeschool!

Some of us school year round and some of us have our own unique schedule, but many of us are starting back to school this week. This year's curriculum is ready, plans are made, notebooks prepared...we are set to begin! As you start a new school year, make sure you remember your goals. A top priority for me is to

Keep Learning FUN!

Q: There is plenty of laughter in our home, but how can I tell if they are learning?

A: Engage them in conversation about what you are studying. Are they able to answer your questions?

Q: I run a boring homeschool. How can I make learning fun?

A: Switch up the curriculum with games and activities. I'm suggesting a heavy dose of activities that are outdoors and high energy.

"When you start recognizing you are having fun, life can be delightful."

-Jane Birkin

"I never did a day's work in my life. It was all fun."

-Thomas A. Edison

Teachers Ignite the Spark

By Paul Wellstone

I saw as a teacher how, if you take that spark of learning that those children have, and you ignite it, you can take a child from any background to a lifetime of creativity and accomplishment.

I want to be an artist.

A Lifetime of Learning

By Marjorie Montgomery

Learning is something we never outgrow. We will keep learning as long as our hearts are beating. Some of us learn more purposefully and others learn through the school of hard knocks. Who taught them that learning was a drudgery? Who robbed them of the joy of discovery? It is time to take our students back to the moment in their childhood where they faced the world with fascination and awe.

When I hear a young student moan and groan about going to school, or a homeschooler complain about their assigned schoolwork, it grieves me. Our creator invites us to enjoy His creation which, by his report is "very good!" Lets marvel at the wonders of his hand and keep learning fun!
